

2014 Predictions on Vaccines:

Do Not Let the Elite Vaccinate You and Turn You into A Hybrid

Problem → Reaction → Solution (The Hegelian Dialectic)

Flu shots → Deadly Vaccinations → 3rd Strand DNA

We talk about people getting a flu shot, or getting an Avian Flu inoculation. There is another very insidious disease, if you will, which is really a man-made disease – it's a biological construct called MERS Coronavirus out of the Middle East. It's the Middle East Respiratory Syndrome. It's made its way into Europe to a certain extent and eventually, because of air travel, it will reach around the world.

It's another example of where inoculations or vaccines are being derived – they're trying to derive for...

I always like to go all the way to the end: What's the purpose? What's the goal?

If you have a manmade or engineered virus, why was it created? Is it simply just to kill people? Well, that's one part of it, but if you go further and you go deeper than that, it is to get people to *demand* a vaccine, a shot - or a pill.

Why, if you're in a position of control, of power, of ultimate power, why would you want people to *demand* a vaccine?

Well, it's because something is in the vaccine that you want people to then have as a part of their body. Well, what is in the vaccine that you want everybody to have inside their body?

It is a DNA manipulator – a modifier – 3rd strand DNA.

There is already - and you can find this on the internet - in existence a 3rd strand DNA constructed of silicon. Again, we go back to the silicon chip in computers. The 3rd strand is made of silicon and is also coated in gold. If you talk about nano-technology and nano-layers, this is an extremely thin coating of gold - down to a billionth of a millimetre of gold that is coating the silicon from which you are building the 3rd strand of DNA. The purpose of the gold is to increase the surface area around this strand so that more information can be digitally imparted or programmed. Essentially what you're doing is creating a 3rd strand of DNA, you are transferring that or imparting it into a person's body through a vaccine that that person has demanded because they're afraid of contracting MERS coronavirus, or avian flu, or whatever it may be [EMcD: in 2020 this is SARS-CoV-2].

And so the government, if you will, or the Powers That Be, sit back and they kind of chuckle and say, well, we couldn't force people to take this vaccine or to take this hidden 3rd strand of DNA – they would rebel against it. But if we create the Problem and present the Solution, people will demand the Solution; thus we will achieve our ultimate goal of having this DNA in every person changed.

Well, let's go deeper: What's the goal? What's the purpose?

You go and change everybody's DNA – what do they become? They become a hybrid.

The insidious part of this is that once a person is injected, almost immediately their DNA undergoes a transformation. Almost immediately they lose all awareness of the fact that they've lost their independence: their ability to think on their own; to make decisions on their own. And to affect them on a moral level: their moral independence; their beliefs – religious, moral, ethical, legal, all of those go away.

If you remove the independent thought and that awareness that you've lost your independence is also gone, what then do the Powers That Be do with these new forms of humans, hybrids? They can control them! They can turn them into a serf class. Serf: a member of a servile feudal class bound to the land and subject to the will of its owner. A class of slaves to serve the elite – to serve the Ray Kurzweils [1] of the world who want to achieve immortality. But they need to have labour to manufacture, develop all of the technologies, and they have enough technologies now.

The technology – the scientific world, if you will – has reached the level where they don't care about hiding it anymore. Their agenda is so far advanced – both politically, philosophically, their sense of morals, and technologically that no longer are they worried about you and me as the serf class – and the coming serf class.

They're not worried about what we think. They're not worried about us rebelling. And in fact, we won't rebel – partly because, right now, we've been so dumbed down through a variety of mechanisms. But once people demand the [vaccination] and they are *truly* dumbed down to where they've lost that awareness that something has happened to me, now they can do what they want with us.

They're achieving what I call a 'hive mentality' like a beehive: worker bees, soldier bees, serving the queen. The queen in my estimation is this elite class that's in power – and its NOT the politicians – forget the politicians – this has nothing to do with Republicans, Democrats [EMcD: or Conservatives and Labour in the UK], Tea-Party, Libertarians, it has nothing to do with political structure or classes. It has to do with the small group that is in control and has been in control since ancient times.

Note from EMcD (21st November 2020): [As in the days of Noah...](#)

In Noah's day the sons of men and the sons of God mixed and produced hybrids which, by definition, were unsaveable. Therefore, God had to destroy them, which He did in the world-wide flood. If God had not done so, these hybrids would have continually reproduced in kind and thereby destroyed God's plan of salvation for Adam's descendants. Scripture tells us that the last days will be like the days of Noah. One of these similarities may be the creating of hybrid humans of some kind.

The Bible also warns us against taking 'The Mark of the Beast' because it will damn us to hell. Why will it do that? ... If the Mark of the Beast causes a hybridisation of mankind in some way, then, as in the Days of Noah, these hybrids *would* become unsaveable. How might this modern-day hybridisation – or, if you prefer, transhumanism – come about? Vaccinations could very easily become the means of achieving it, precisely as suggested in this YouTube video...

There may indeed be no (or few) problems with the ingredients of any initial C19 vaccine, but that may simply be *Boiling the Frog*: i.e., lulling the people into a false sense of security with the first few harmless doses, then gradually altering the ingredients, so that any C19 vaccine will, at some stage, disrupt our humanity ... An eventual salvation-destroying vaccine may or may not be the current Pfizer/BioNTech one, or the Oxford/AstraZeneca one, or the Moderna one, but it could very well become the final vaccine that all the previous C19 vaccines will give way to further down the line...
